

# SECTION V

**SECTION V - RECONCILING COUNTY'S GENERAL LEDGER TO DSS-1571 REIMBURSEMENT REPORT****December 31, 2023****Section V-A Methods of Reconciling Records**

1. **The purpose of this section is to provide counties with suggested way to reconcile all records periodically, so any differences may be easily traced and identified.** This process is commonly referred to as providing "an audit trail". Two methods will be discussed:
  - a. *When the DSS-1571 report is prepared from the County General Ledgers.* In this case expenditures are often valid expenditures for a DSS operation, but unallowable in part or in total for Federal/State reimbursement, i.e., 100% county-supported cost.
  - b. *When the DSS-1571 report is prepared from a set of accounting records separate from the County General Ledgers.* In this case the county DSS may not be aware of the manual adjustments made by the County Finance Office, for distribution of indirect cost, county allocable costs or the timeliness for paying obligations at the Finance Office.
2. The forms provided below are guides to be use by either county DSS or Finance Office employee (not required). **The primary purposes of these forms are to identify and document the differences in costs between county records and DSS records.** If performed monthly all adjustments, reclassifications, etc. can be identified. Therefore, when audits or other inquiry arise the county's DSS will be able to support all expenditures. Also, the county could maximize Federal and State reimbursements of allowable costs without risking a monetary disallowance due to future audits. For reporting purposes, the forms are separated into two functions:
  - a. Staff costs (salary and fringe benefits), and
  - b. All other administrative costs.

**The purpose of this process is to identify differences between the County General Ledger totals and the amount of allowable costs reported in the DSS-1571 report.**

1. **At the close of the monthly reporting cycle the employee should begin with the applicable account balances from the County General Ledger.**
2. From each account deduct all costs that appeared on the general ledger but are not reimbursed by Federal and State funds in Social Services' programs. Examples are:
  - a. Salaries and fringe benefits of employees paid from other Federal and State funds, such as CBA, etc.

- b. Administrative expenditures in excess of allowable and/or approved limitations, such as travel paid over current state maximums, or cost of space exceeding the annual approved amount.
3. To each account add all costs that did not appear on the general ledger but are allowable for Federal and State reimbursement. Examples of these would be:
  - a. Adjunctive personnel cost such as workmen's compensation.
  - b. Non-cash administrative expenses to include building depreciation, indirect costs, etc.
4. **Consider any prior month adjustments made by the county Finance Office or county DSS which may either have already been reported or omitted due to lateness in reporting.**
5. After identifying these additions, deletions and adjustments, the balances should be the amount reported for reimbursement to the State Division by the administrative expenditure report DSS-1571.

**When two different sets (from the county finance office set) of accounting records are needed by the county DSS** it is important for the records to agree and an audit trail be established for documentation purposes. One reason for two sets of records may be the deadline for submitting the DSS-1571, versus the early closing date a county uses to end its monthly operations. In this case, it is likely reconciliation will be done during the subsequent month.

1. **The employee should begin with the applicable account balances from the county DSS records at the close of the accounting cycle.** In preparing the DSS-1571 the employee may have already added or deducted certain costs which were or were not allowable for Federal and/or State purposes.
2. Considering these additions and deletions is the basis for arriving at costs subject to the DSS-1571 report.
3. **On the worksheet the employee should reflect the end-of-month balances from the County General Ledger.** Make sure separate accounts in the county records are summarized to arrive at a DSS-1571 account total.
4. The employee should determine the differences, if any, between the DSS-1571 reported costs and the County General Ledger costs.
5. If differences exist on the worksheet the employee should examine account differences by reviewing items posted to accounts at both levels and if necessary, discuss the differences with personnel in the County Finance Office. **Any differences found should be documented on the worksheet with an explanation.** Differences identified may be determined to be allowable costs which can be reported the following month.
